

## **Planting Perfection**

Josh Perkins of Patton's Nursery demonstrates the proper way to plant and care for a tomato plant during a presentation late last month at the St. Clair Scenic Regional Library. The library is conducting a "Growing a Community" series in an effort to establish a partnership with local businesses and organizations and will sponsor events either at the library or at the businesses themselves. The events will be contoured to showcase the businesses and their focus. Events will be scheduled each month.
