NEW EQUIPMENT — The Warrenton branch of the Scenic Regional Library recently installed new digital microfilm reader-printers. The equipment was purchased with grant funds from the Missouri State Library. Along with the capability to print an image from microfilm, the ST ViewScan System also will provide users with the option to save images to a portable-USB flash drive or send the images via email. Maureen Willmann, the Scenic Regional Library's IT manager, tests a microfilm reader-printer at the local branch.
