Plants Of The Bible

Plants played an integral part in the lives of those who lived within the time frame of the Old and New Testaments. From what folks ate, built with, and made their living by, the significance of individual plants is evident in their physical applications as well as literary e.g. Christ's parables. St. Louis Master Gardener, John Hensley, will discuss both the realities of and speculations about the history and botany of the plants of the Bible at Scenic Regional Library's New Haven branch, Thursday, November 15 at 6 p.m. Registration is encouraged and can be done by calling the library at 537-237-2189 or go online at scenicregional.org and click on events.

Teens And Tweens Celebrate Dia Des Los Muertos

Teens and tweens helped Scenic Regional Library's New Haven branch celebrate Dia Des Los Muertos (or, the Mexican "Day of the Dead," with crafts, music, and snacks. Participants were each given a ceramic skull to paint and decorate as part of the activities to educate students about the traditions kept primarily by those living in the southern states of Mexico. Chips and salsa, donated by New Haven's El Ranchito's restaurant, were also a big hit as crafters munched away while Latino music played in the youth section of the library which was festively decorated for the event.
