

# Four Cent Building Tax <sup>SM</sup> Would Build/Furnish New County Library Bldg.

Warrenton—Community groups interested in learning more about the new library facility being planned for the Warren County Library District, are asked to call the Warrenton Library to schedule a speaker. The library's number is 456-3321.

The new library will be built if county voters approve the proposed four cent building tax on April 6. The tax income would be used to construct a 7,500 square foot building in Warrenton on Highway 47 just south of the Douglas Brown Funeral Home.

The new library would be four times the size of the current library which is located on South Market Street across from the Warren County Annex Building. The

planned facility would allow the book collection to grow to an estimated 41,000 volumes in coming years. The current library holds almost 23,000 volumes.

Seating for library users would be increased from 18 chairs to approximately 54. There would also be space for additional Internet workstations. A meeting room, which will hold 50 people will be available for use by community groups at no charge.

The new building will be fully accessible for the disabled and there will be on site parking.

The four cent building tax would be for ten years and will finance the building and furnishing of the facility.
