

Warrenton library closed due to COVID

The Warrenton branch of Scenic Regional Library was closed Friday, Oct. 9, due to a staff member testing positive for COVID-19.

The library district said it does not have a definite date for when the Warrenton branch would reopen, but that other library locations are unaffected.

"We apologize for any inconvenience. Our oth-

er branches are currently open and can take care of your library needs in the meantime," said district business and HR manager Kjersti Merseal.

Library officials said virtual programs will continue to be offered through the Warrenton branch's Facebook page, and that the library's drop box will remain open for anyone who needs to return

their books.

In an email to *The Record*, library district Director Steve Campbell said the Warrenton staff member is at home and feeling better. He said the district hopes to reopen its Warrenton branch by early next week, but it will depend on directions from the Warren County Health Department regarding staff quarantines.
